Our Capabilities

Construction Management

- Construction Oversight
- Quality Assurance & Inspections
- Outage Coordination
- T&D Line Patrol

Project Management

- Project Controls
- Regulatory Compliance
- Data & Risk Management
- Material Management

Protection & Controls

- Relay Testing Services
- Transformer Testing
- Commissioning Services
- Circuit Breaker & Switch Testing
- Substation Equipment Testing

Our Capabilities

Advisory Services

- Strategic Consulting
- Business Intelligence
- Program Management
- Compliance Support

Engineering Services

- Standards & Specifications
- Source Inspections
- Permitting
- Distribution Design
- Pole Loading Analysis

Asset Management

- Asset Inspections & Inventory
- Joint Use Services
- Drone Inspections
- Easement Surveying & Staking

Our Capabilities

Storm Response

- Damage Assessment
- Wire Down Guard
- Safety & Security
- Crew Mobilization

EHS & HPI Advisory Services

- Consulting & Administrative
- Training
- Risk Assessment & Auditing
- Incident Investigation
- Staff Augmentation

Celebrating Customer Wins

Enhanced Efficiency for \$4B CAPEX Program

TPS delivered oversight for AEP's \$4B annual capital program across 11 states and 260K+ line miles. Localized teams improved compliance, project scheduling, and rapid resource deployment, driving efficiency and cost savings.

Streamlining \$100M Distribution System Improvements

After severe weather, Oncor expanded funding by \$100M and deployed 75+ construction crews. TPS provided oversight resources to manage execution, enhance quality control, and ensure timely delivery of system upgrades.

Improving System Reliability & Operational Excellence

Duke Energy's multi-state CAPEX expansion required robust project oversight. TPS deployed trained local managers within three months, improving visibility, safety, and compliance while enabling rapid resource mobilization.

Revolutionizing CAPEX Oversight

Oncor faced escalating costs from material and contractor issues in a \$1.7B+ CAPEX program. TPS used technology and PMO expertise for real-time tracking, communication, and QA/QC, significantly reducing risks and costs.

Optimizing Post-Construction Inspections

CenterPoint's high-volume inspections required efficiency and accuracy. TPS introduced mapping tools, real-time dashboards, and automated reporting, streamlining workflows and improving data integrity across the distribution system.

Our Clients

Think Power proudly supports a wide range of utility and energy organizations, including:

Core Markets

We serve critical infrastructure across sectors:

The TPS Difference

Trusted Partnership

- Collaborative, customer-centric solutions
- Valuable insights & best practice sharing
- Transparent & honest communication

Technology-Driven Solutions

- Fit-for-purpose solutions
- Increased Efficiencies
- Enhanced Communication
- Data-driven Insights

Safety & Human Performance Excellence

- Best-in-class safety standards & practices
- Risk & incident mitigation
- Comprehensive safety training & procedures

Flexible & Agile Service Delivery

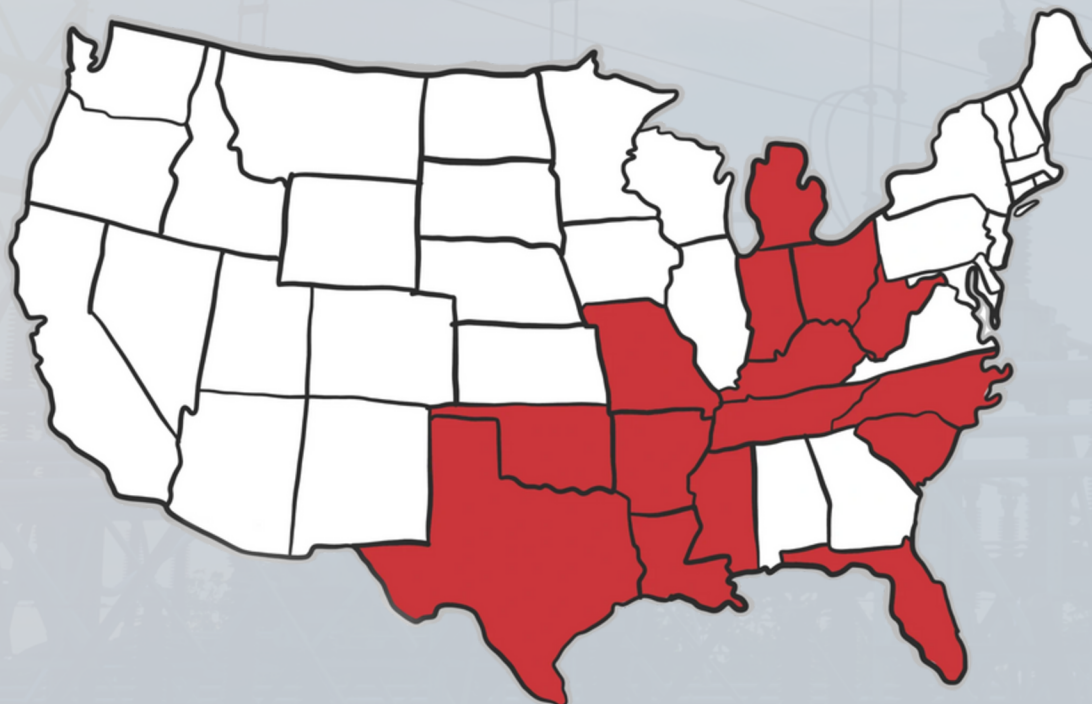

- Unmatched Responsiveness
- Flexible to evolving needs
- Scalability to accommodate changing requirements

About Think Power

Who We Are

Founded in 2013 with the vision of utilizing modern technology to influence and positively impact the utility infrastructure industry, Think Power Solutions (TPS) has established themselves as a trusted partner in delivering electric infrastructure solutions powered by leading technology, practices, and people.
